## TO PLACE BUST IN Indiana State Library MILITARY MUSEUM

Fund Started Here in Order to Have  
Gen. P. A. Hackleman Represented in State Collection

### IN BASE OF THE MONUMENT

Recognition Due Only Hoosier General Killed in Civil War—\$11 of \$50 Required Pledged

A proposal to place a life sized bust, in color, of Brigadier General Pleasant A. Hackleman, a Rush county man who was the only Indiana general killed in the Civil War, in a pictorial military museum being established in the base of the state Soldiers and Sailors Monument in Indianapolis, has been received by the Daily Republican from Oran Perry, superintendent of the monument.

Mr. Perry calls on the Daily Republican to raise \$50 to pay for enlarging a photograph to life size, and himself offers to contribute a dollar, because he was intimately acquainted with General Hackleman and served under him as sergeant major.

Before starting the project, the Daily Republican consulted with several local citizens, who believed that no pictorial museum, representing Indiana's part in all wars, beginning with the Revolution, would be complete without General Hackleman represented in it. They feel that it is the duty of Rush county to bear the expense of having a bust of General Hackleman placed in the collection because he was a Rush county man and played a prominent part in the Rebellion, although his services have never been recognized by the state.

Repeated efforts have been made to get appropriations from the state legislature to erect a monument to the memory of General Hackleman, but they have all met with failure.

"It would be an everlasting shame which Rush county could not escape," said one Rushville man yesterday, "if General Hackleman were not represented in the collection, because it is doubtful if any Hoosier played any more prominent part in the Civil War than did General Hackleman."

Members of the Rush county chapter of the Sons of the American Revolution, who attended the state banquet recently, say that Mr. Perry spoke regarding the collection which he is making. They have the utmost confidence in Mr. Perry and say that he will place the bust in the collection if the sum required is raised and placed in his hands. It is assured that an excellent likeness of General Hackleman can be obtained from among his descendants here.

It will be necessary to raise only \$39 as \$11 has already been pledged counting the \$1 which Mr. Parry says in his letter he will contribute. Dr. F. G. Hackleman, president of the Rush county chapter of the Sons of the American Revolution, when

## PARCELS NOT ACCEPTABLE

Soldiers Uniforms May not be Sent Through the Mails

Parcels containing uniforms of discharged soldiers addressed to the war department will not be received for transmission through the mails, according to word received here today from Washington. The order reads as follows:

"Postmasters are hereby notified that a recent act of congress permits discharged soldiers to retain clothing and other equipment which they take away with them and that, therefore, postmasters should not accept parcels containing these articles for return to the War Department."

## HUSBAND FAILS TO APPEAR

Frances I. Inderrden is Granted Divorce on Payment of Costs.

Mrs. Frances I. Inderrden has been granted a divorce from her husband, Joseph C. Inderrden, on the payment of costs, and her maiden name restored to Frances Gwynn, by Judge Will M. Sparks in the circuit court. The defendant failed to appear and the divorce was granted without opposition.

The case of Ollie Brown against Benjamin Jones and Edward Johnson, automobile dealers, on an account, for \$75, was dismissed and the costs paid.

## TRIES HABEAS CORPUS SUIT TO GET CHILDREN

William A. McDonald Alleges That He is Now Prepared to Care for Them Properly.

### ARE IN KNIGHTSTOWN HOME.

The first habeas corpus suit in the circuit court for many years was filed today when William A. McDonald of Connersville instituted proceedings to get the custody of his four minor children who are in the State Soldiers and Sailors Orphans home in northern Rush county, near Knightstown. The superintendent of the home, Luther Short, and David Strouse, D. L. Mustard and Ida L. McBride, trustees, are made defendants.

McDonald sets forth in the complaint that the superintendent and trustees are unlawfully and without cause holding his children, who were placed in the home November 1, 1916 by an order of the Rush circuit court, because McDonald was found not to be a fit person to have the custody of the children. He avers that he is now able to care for them; that he has fitted up a home at 105 Eastern Avenue at Connersville, and employed a housekeeper.

The children whose custody he seeks are: Helen 12, Hazel 10, James 8 and Josephine 6.

## NOTIFIED MEN MAY KEEP THEIR UNIFORMS

County Army Selection Board Receives Official Notification From State Officer

### MAY WEAR UNIFORMS AT WILL

The county army selection board has been officially notified that any person who served in the United States navy, marine corps or army, upon honorable discharge and return to civil life, may retain a complete uniform. The notification came in the form of a telegram from Robert C. Baltzell, state conception officer, quoting an act of congress.

The matter of retention of uniforms by soldiers, sailors and marines returning to civil life has been unsettled and discharged men were up "in the air" figuratively speaking, until arrival of the latest of official order, which definitely settles the subject. The one uniform referred to according to the congressional act, consists of one complete suit of outer uniform clothing, including the overcoat and such articles of personal apparel and equipment the men may have. The order also permits the discharged men to wear such clothing at will.

### SCALDED BY HOT COFFEE.

## PRIEST TO GIVE BOARD'S VERSION

County Assessor Calls Township Assessors and Their Deputies For Meeting Tomorrow

### LAND VALUES MUST BE RAISED

He Says Real Estate and Improvements Should Average From \$135 to \$140 an Acre

Township assessors and their deputies have been called to meet tomorrow morning at ten o'clock in the court house when Earl Priest, county assessor, will explain the provisions of the new tax law, as they were set forth at the first of a series of conferences conducted by the state tax board in Indianapolis Wednesday.

Mr. Priest says that the earlier prediction that the appraised value of land and improvements should average about \$125 an acre in this county, will have to be revised. He estimates—and he will so tell the taxing officials tomorrow—that the taxable value of farm land and improvements will have to average between \$135 and \$140 in order to meet with the provisions of the new law, as interpreted by the state board.

Furthermore, Mr. Priest says, the simple expedient which some assessors and their deputies have adopted, of simply doubling last year's appraisement of household goods, will have to be changed because adding a hundred percent to last year's valuation on most household goods will not bring very many near the actual cash value.

Mr. Priest will make it plain to the assessors that there is no other alternative for them—they must enforce the new law to the letter and show no favoritism. If all classes of property are not taken at their true cash value, the state board has two courses of action, either one or both of which may be followed.

The new law gives the state board the power to remove any assessor, be he county or township official or deputy, if, in the opinion of the board, he is not enforcing the law. Furthermore, the board may order the reassessment of any individual or any unit up to and including a whole county, or may raise the total valuation equally, a certain percent, in any taxing unit, if the appraised value is not high enough. An assessor or deputy assessor who may be removed from office by the state board, is given the privilege of appealing his case to the circuit court for a hearing.

Mr. Priest will urge upon the assessors the necessity of following the law because if the state board, for instance, should find it necessary to raise the assessment in any township, or the whole county, some hardship would result due to inequalities in taxation, because the same percent of increase would be added to each individual's valuation. The injustice would result because some valuations would be higher proportionately than others.

Another reason for taking all classes of property at their true cash value will be outlined by Mr. Priest. The assessors' attention to the fact that the new law does not allow any township or city to have a rate in excess of one and a half cents on the dollar, with certain exceptions. If a city or township has good reasons for making its rate higher, it is necessary to petition the state board for the privilege. The board may refuse or grant the request. If it is granted, the people on petition may submit the question to a referendum\* vote

## WILSON GREETED BY PRES. POINCARE

President's Arrival in Paris Today Sets Machinery of Peace Conference in Motion

### FINAL AGREEMENT IS NEXT

Leaders, in Ratifying Each Detail, Will Draw up Draft of Preliminary Peace Pact

(By United Press.)

Paris, Mar. 14.—President Wilson arrived here from Brest at 12:30 p.m. today.

President and Madame Poincare greeted President and Mrs. Wilson at the station. While their wives chatted the two presidents inspected the guard of honor. A band played the American national anthem as the train pulled into the station and The Marsallaise as the Wilsons started for their residence accompanied by an escort of cavalry.

With President Wilson's arrival in Paris today the machinery was set in motion for resumption of the preliminary peace treaty.

The scheduled meeting of the supreme war council was cancelled to permit conferences by the president, Premier Lloyd George, Premier Clemenceau and other leaders.

As all details of the treaty have been virtually completed by the various committees, the main problem was that of reaching a final agreement. The leaders, in ratifying each detail, will draw up the formal draft. All indications today showed that the treaty would be finished by Mar. 20 and the Germans called in about March 25.

Whether the league of nations would be incorporated in the preliminary treaty has not been determined. An invitation was sent to all neutrals who have their representatives here, to meet the peace delegates in an unofficial conference before the end of next week, to present their ideas.

Sentiment today seems to favor Geneva as the seat of the capital of the league of nations council.

The supreme war council has received settlement of the Turkish-Albanian frontier. The German boundary will be included in the preliminary treaty.

The problem of feeding Poland has narrowed down to the necessity of getting the Polish division from France into their own country to keep railways open.

Basle, Mar. 14.—A Weimar dispatch said: "It has been learned that the government Wednesday appointed German delegates to the peace conference, including Foreign Minister Brockdorff and Dr. Edward David, first president of the national assembly.

The German main argument regarding indemnities will be that if food and raw material are permitted to enter Germany, they will stand a fair chance of paying them; otherwise her imposed obligation cannot be met.

London, March 14.—Delegates to the league of nations society convention left for Paris today to present to the peace conference recommendations for a number of amendments to the covenant. Each delegate will take up the recommendations with a conferee of his country and will urge that the constitution be changed accordingly.

Brussels, Mar. 14.—The allied economic council today presented the German representatives with the new terms for reviving that country which require Germany to turn over her merchant fleet.

### SEEK NEW HUN STRIKE

Copenhagen, Mar. 14.—Agitators for a new general strike throughout Germany to be called March 25, is growing, according to dispatches received from Berlin today.

## ONLY WEEK FOR CAMPAIGN

Red Cross Urged People to Prepare for Drive for Clothing.

Red Cross headquarters has announced that the week of March 24 to 29, and that week only, will be set aside for the campaign for clothing for the joint benefit of all European countries except Germany, Turkey, Bulgaria and Austria. They want to urge all people to begin to get their clothing ready for the campaign and request that all the clothing be brought to the Red Cross sewing room on the first floor of the court house.

## FAMOUS PLAYER OF BAGPIPES IS COMING

Charles O'Donnell Will Offer Feature Attraction at St. Patrick's Day Celebration Monday

### INSTRUMENT MADE BY HIM

One of the special attractions at the St. Patrick's day celebration which will be held in the hall of the Catholic church next Monday evening, will be Charles O'Donnell and his bagpipes. The pipes which Mr. O'Donnell uses were made entirely by himself as the original makers of the pipes in Ireland are fast dying out. The bagpipes will soon become an obsolete instrument, it is said. Most of the times played by Mr. O'Donnell are traditional, and have never been written but have always been played by ear. Many of the tunes are the ones he heard from his father in Ireland many years ago and have never been played by anyone else.

The Irish bagpipes differ a great deal from those of the Scotch, Mr. O'Donnell explains. They are played in a sitting position and the air is supplied to the pipes by a bellows which are pressed by the arm as the pipes are played. They have seven pipes while the Scotch have five. They are also more of a concert instrument, as they are tuned in concert pitch, and are of a softer tone than the Scotch bagpipe.

Mr. O'Donnell goes each year to Chicago to attend an annual gathering of bagpipe players. He has collected more than 1800 Irish tunes and his visit here is considered a rare treat.

## AMERICAN SOLDIERS AND JAP POLICE CLASH

State Department Makes Short Statement in Absence of Complete Details of Affair.

### MAY HAVE BEEN NIGHT BRAWL

(By United Press.)

Washington, Mar. 14.—A clash between some American soldiers and Japanese policemen and civilians at Pien Psin occurred last Wednesday and Thursday, a state department dispatch announced today. In the absence of complete details of the affair, the department confined itself to a short statement embodying the information that the incident is being investigated.

The fact that the clash took place, according to the dispatch, on Wednesday and Thursday, would indicate that it was a night brawl or a series of small fights, the department statement said.

### GRADE CROSSING ACCIDENT

Covington, Ind., Mar. 14.—George Maltzberger, age seventy-three, was seriously injured at the Big Four railway station yesterday when a closed buggy in which he was riding was struck by a west-bound passenger train due here at 9:20 a.m. The view was obstructed by a string of box cars.

## SAYS GOD'S LAWS MUST BE FULFILLED

Evangelist Miller Declares if They're Disobeyed, Only Promises of Wicked Life Are in Store

### SERMON AT THE M. E. REVIVAL

Two United With Church, Making Six Conversions For Meetings Which Continue Another Week

God's laws must be fulfilled to the letter else his promises can not be appropriated, according to Evangelist Miller, in his sermon at St. Paul's M. E. church revival. If His laws are disobeyed, only the promises of a wicked life are in store, he said.

A number by a quartet composed of Mrs. George Hogsett, Mrs. George Wiltse, Dr. F. M. Sparks and the Rev. Clyde S. Black, was a feature of the song service last night. Two more were united with the church last night, making a total of six conversions since the meeting began about two weeks ago. The revival will continue through next week.

Speaking on "The Two Ends of a String," Mr. Miller took Peter 4:17 for his text, "What will be the end of them that obey not the gospel of God?"

He said in part: "To those who profess to believe in the Bible and Christianity, these words are wrought with heart-sickening significance. In fact, the text is a sermon in itself. What will be the end of the man who refuses to obey God?"

"Here God gives me a book that tells me where I came from and where I am going without which, I would not know of my origin and destiny except as I might glean it from the dim outlines of reason and nature, either or both of which would be entirely unsatisfactory to me."

"One of the first things that God instituted and brought in immediate effect following the creation is a thing called 'discipline.' He showed man's superiority over the animal kingdom by giving him dominion over them and then showed his superiority over man by putting in his hands a set of laws governing his conduct in this world, making him amenable to the laws of the creation which, on account of finite minds not being able to read the future, was an absolute necessity to insure our prosperity here and hereafter.

"In order that everything may work out according to God's pre-arranged plan, it is very obvious that His laws must be fulfilled to the letter. All men recognize the all powerful hand of God in ruling the affairs of his own creation.

"If I obey the laws of God, I can appropriate His promises to my life. If I disobey Him, I must surely appropriate the promises of a wicked life. A study of plants and the ingenuity of some of them almost makes the head swirl and fairly Continued on Page Three

## FIRST BATTLE WAS AT MARKET CONTINUES THE ST. MIHEL SECTOR TO HOLD STEADY TODAY

Ralph Pea Writes That All the Former Company B Boys Who Are With Him Are Well.

### ARE WANTING TO COME HOME

Mr. and Mrs. Elsbury Pea have received word from their son Ralph, who is now in Luxemburg with the 124th Field Artillery. There were seven of the former Company B boys together at the time of writing, Edward Black having been returned to the company, after having been wounded at St. Mihiel. The letter in part is as follows:

"Our first fight was at St. Mihiel. About a year ago the French and English lost about 30,000 men in taking this hill and then lost it. Our doughboys took it in about an hour. They went so fast that we had to advance twice to keep in range with the artillery. The infantry had very few casualties in this drive. At the Argonne drive we started the fight on the 26th. We followed the infantry so close that we could see the doughboys advancing on a hill just about a half mile in front of us. We were firing for the 91st division. All the fellows that are here from home are well as far as I can find out. We received our first casualties at Romange, two gun crews having been completely wiped out. They had a good observer and had a direct range upon our guns. You can talk about your artillery, we sure had some there, all kinds and sizes that anyone could mention. We have advanced since then, almost to Coblenz, where the army of occupation is stationed, and will not get to go much farther."

He closes stating that he is well and is in hopes of returning to the States and home before very long. He also states that they have a very good time there and are receiving their pay regularly.

## THORNTOWN TO MEET HUNTINGTON TONIGHT

Former is Favorite in State Basketball Tourney After Defeat of Anderson Yesterday.

### GREENCASTLE IS DEFEATED

Lafayette, Ind., Mar. 14.—Approximately 6000 basketball fans today looked forward to the Thorntown-Huntington game which is the first game on tonight's schedule.

Since the burst of speed and team work on the part of Thorntown five yesterday when they beat Anderson, it was thought likely that they would take the game tonight.

In Greencastle's defeat at the hands of Rochester in the first game today by the score of 16 to 8, the latter team is slated to oppose Columbus in the final game of tonight. Columbus is favored over Rochester.

For the second game scheduled the score was Jeffersonville, 22, Martinsville 16.

In the third game at 11 o'clock the score was Emerson of Gary 33 and Kendall 13.

### DEMONSTRATION A SUCCESS

At Least 1,200 Persons Saw 9 Different Tractors Perform

The tractor demonstration held at the Hackleman farm, west of the city, Wednesday and Thursday was brought to a close yesterday at 4 o'clock, when the two fields being plowed were finished in "shipshape." Nine different styles of tractors took part. In addition to plowing some of the tractors did ditch work or pulled discs and prepared a seed bed. At least twelve hundred people attended the demonstrations and a good interest was shown in the tractors, which are growing in popularity in this country.

### SUCCESS NOT FOR LEANERS

Man That Wins in Life's Struggle Must Have the Utmost Confidence in Himself.

Power is the goal of every worthy ambition, and only weakness comes from imitation or dependence on others. Power is self-generated. We cannot increase the strength of our muscles by sitting in a gymnasium and letting another exercise for us.

Nothing else so destroys the power to stand alone as the habit of leaning upon others. If you lean you will never be strong or original. Stand alone or bury your ambition to be somebody in the world.

The man who tries to give his children a start in the world so that they will not have so hard a time as he had is unknowingly bringing disaster upon them. What he calls giving them a start will probably give them a setback in the world. Young people need all the motive power they can get. They are naturally learners, imitators, copiers, and it is easy for them to develop into echoes or imitations. They will not walk alone while you furnish crutches; they will lean upon you just as long as you will let them.

One of the greatest delusions that a human being could ever have is that he is permanently benefited by continual assistance from others.—Orison Swett Marden, in Success.

### AIM SHOULD BE PERFECTION

Man Who Is Satisfied With Nothing but the Best Is Man Who Will Make Good in Life.

Don't get into the "that's-good-enough" habit. Nothing short of "perfect" should be your motto.

Slovenly habits of mind and hand grow faster than good habits. A slipshod manner of thinking results in slipshod methods of work.

You will never become efficient in any one thing till you get it firmly fixed in your mind that if another can do it better than you you are not doing well.

Thoroughness and accuracy play a big part in the success or failure of the individual.

You may be artistic and temperamental and dreamy, but you will never realize your dreams till you get down to brass tacks and do what you do with precision and dispatch.

There is plenty of time to exercise your artistic moods after you have learned all there is to know of the mechanical and fundamental principles of the work or accomplishment you think you were out to do.

Remember that interpretation comes last.

There must be weeks, months and years of systematic and consistent drill before one is capable of exercising the faculty of interpretation.

## BETTER EMPLOYMENT SITUATION IN CITIES

Start of Spring Work on Farms Results in Furnishing Work for Many

### STILL MANY UNEMPLOYED.

Indianapolis, Ind., Mar. 14.—Improvement in the unemployment situation in many Indiana cities as a result of a demand for men on farms, was reported by the United States Labor Bureau here today.

Start of spring work on farms has resulted in furnishing employment for many men, it was stated.

There are still hundreds of workers without employment in Indianapolis and other larger cities of the state. However, labor bureau officials are looking for this to diminish steadily. They point out that building work will start on a larger scale than ever before and that as soon as materials are available and weather permits.

Amusements

Picture Fairbanks' Ambition

The fact that "Arizona" was pictured four years ago, by its author, Augustus Thomas, did not discourage Douglas Fairbanks from doing it himself and reviving the attractive character of "Lieutenant Denton." It was shown at the Princess theatre last night and will be shown again today.

Like the typical Shakespearian actor that he is, Douglas has been spouting the lines of "Arizona" to such an extent that his office staff have found it necessary to memorize cues, and sacrifice their routine labor to "act out" with Fairbanks.

Ever since he first saw the play "Arizona" it has been his dream, his one great ambition—to produce it, and when the opportunity arrived to do it, it was happy day for Douglas Fairbanks.

An all star cast was organized which includes Theodore Roberts, Marjorie Daw, Frederick Burton, Kathleen Kirkham, Frank Campeau, Marguerite de la Motte, Kate Price, Robert Boulder, Raymond Hatton and Albert McQuarrie. The latter appeared with Mr. Fairbanks in "He Comes Up Smiling" and "Bound in Morocco." This is said to be as fine a cast as has been assembled in any motion picture.

The Bride's Awakening

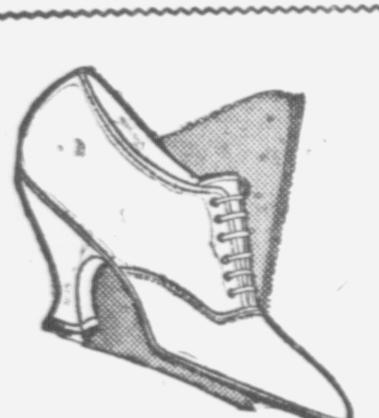

"The Bride's Awakening," in which Mae Murray takes the leading role as Elaine, will be the offering at the Mystic theater tonight. Tom Mix is advertised for tomorrow in "Roman Cowboy." The following brief summary of the story of the photoplay for tonight gives an insight into the dramatic situations which are developed:

"If I thought you did not love me, as you say you do, I would shoot you and then myself." Which was quite annoying to Richard Earle. In the first place he was tired of Mrs. Bennett; in the second, he never had any intentions of "flying to the ends of the earth" with her; and in the third, he had just been married to an heiress. Richard had virtually supported himself on the expectation of marrying Elaine Bronson, and Elaine trusted him so implicitly that she not only handed over the checkbook and combination to the safe but even consented to keep their marriage a secret.

This precaution was also Earle's undoing. It premitted Jimmy Newton to fall desperately in love with Elaine, and when Earle told Jimmy that she was his wife and not his ward, Mrs. Bennett was hiding in his room behind the curtain, expecting to elope with Earle. It was a desperately strained situation and its tension was broken by a revolver shot.

—Private Tom Saunders left this morning for Quantico, Virginia, after spending a thirty-day furlough here with Mr. and Mrs. John McCoy.

told of the offer, said that he would contribute \$5. Earl H. Payne, who likewise has been active in the Sons of the American Revolution organization, having twice been state president and once state trustee, stated that he would give a similar amount.

Mr. Perry's letter making the proposal is as follows:

We are establishing in the base of the Monument a pictorial military museum, representing Indiana's part in all wars from the Revolution down. Of all men I knew in the Civil War, General Hackleman deserves a place where his memory will be kept green.

If some one has a photograph of him in Brigadier General's uniform, I can have it enlarged to life size bust, in color, and placed in a handsome frame 30x40 inches for \$50.00.

Will the people of Rush County furnish me the money and trust me to do the rest.

I am not a Rush County man but Hackleman was my Colonel and I was his Sergeant Major.

I will start the subscription with \$1.00 if you, through your paper, will raise the other \$49.00.

#### SAYS GOD'S LAWS MUST BE FULFILLED

Continued from Page One

bankrupts mathematics in the use of figures.

From the largest planet to the smallest insect, each and everything is obeying God's law and it is well that they did or man would find himself destroyed by the forces of nature which surround him.

"Somé people say 'I prefer to hear you preach the love of Christ.' That is what we are doing now. As I show you God's law and its inflexibility, I also show you His mercy. Some of you folks talk about God's

love. You don't love God, many of you don't. If you loved Him, you would keep His commandments. Others don't even appreciate God. If you appreciated Him, you would not take His name in vain or speak disparagingly against the church He instituted.

"It was the inflexibility of God's law that caused Him to offer up Jesus, His only son, in order to keep His law in making His word sacred and still made provisions to save rebellious sinners. The tragedy of the cross was prompted by God's love and made necessary by your willful disobedience.

"There are always two ends of everything, with one exception, which is, eternity. Every other thing has a beginning and an end. It was so with this old planet. There was a time when it was created or spoken into being and the same book informs us there is a day coming when it is going to be as suddenly destroyed and when that time comes, it will be accompanied by wailing

nations, rending rocks, the moon red as blood while this old planet with all he contained will be a reeling mass of flames, and when that day comes, whether near at hand or afar off, we know not and this old planet will fall far over in the dark immeasurable space.

"But the end comes suddenly. So it is in nature. Spring is hardly here before we see the signs of autumn. We are in the cradle or nursery one day and in a few days we become decrepit and have one foot in the grave. Death is not the end of man. It is only the beginning of the end. You come into this world with a scream when the air rushes into your lungs and you will go out with a smothered cry of anguish or shout of victory occasioned by what you see just ahead at the end.

"You may stand high socially, financially and politically and your presence may be sought to grace every function but none of these things count with God."

## After-War Exports.

United States figures for the first after-the-war month are encouraging to those who had hoped that the war time increase in exportation of manufactures would continue on a return to peace. The exports of manufacturers from the United States, in the first full month following the war of December 1918, are, according to a compilation by the National City Bank of New York 140% greater in value than in the corresponding month immediately preceding the war. The total value of manufactures exported in December 1918 was, according to the rank's compilation, \$229,117,000 against \$95,216,000 in the corresponding month of the year which immediately preceded the war. Manufactures for use in manufacturing in December 1918 were \$69,235,000

Life consists largely in wanting things you can't get.

The mintage of wisdom is to keep lost motion out of your mind.

If you have nothing to do don't bother other people doing it.

In order that a few people may do no work, it is necessary for many people to do much work.

against \$30,169,000 in December 1913.

The share which manufactures formed of the exports of December 1918 was practically the same as in 1913, 41% in each case, but the fact that the belief that with the return to normal conditions in the export food stuffs, manufactures will form a materially larger percentage of the exports than was the case prior to the war.

War materials which formed a very considerable share of the manufactures exported up to the termination of hostilities quickly disappeared from the exportations and the December 1918 exports of manufactures consisted solely of manufactures of the ordinary type. Explosives, for sample, exported in October 1918, the last full month of the war, amounted to \$22,156,000, and in December 1918, the first full month after the war, were only \$1,894,000; acids largely utilized in the manufacture of high explosives exported in October 1918, amounted to \$2,015,000 value, and in December 1918 were only \$708,214; firearms exported in October 1918 were \$2,784,000, and by December 1918 had dropped to \$1,886,000; gunpowder exported in October 1918,

## Republican Well And Hearty At 15

The Daily Republican is well and hearty at fifteen, today, its birthday anniversary, thank you, and hopes to enjoy many more like 'em. In fact, the Republican hopes to live to the proverbial ripe old age and to grow and prosper as it has during its fifteen years of existence.

It is a far cry from the Daily Republican in its halcyon days of modest beginning to its present size and ambitions. Fifteen years ago today the first copy of the Daily Republican made its bid for the patronage and attention of the people of Rush county. It was printed on four pages of six columns each and the fondest hopes of its owners were for a circulation of at least eight hundred.

A comparison discloses the strides which have been made. Yesterday 3,280 copies of the Daily Republican, an edition of twelve pages, were printed for distribution. This is the daily average press run. For several months, with very few exceptions, the Republican has printed either ten or twelve pages. The Republican not only is giving its subscribers more actual news, but more store news as well, because advertisers of the county have learned that the Republican is a medium which it pays to patronize.

amounted to 17,835,000 pounds valued at \$15,662,000 and in December 1918 only two months later, had dropped to 163,000 pounds valued at \$72,000.

## The Monroe Doctrine.

The Monroe Doctrine—the principle under which the United States neither joins in European entanglements nor permits encroachments of any foreign power upon the American continent—has been for a century past an integral part of the United States policy. It was instilled into us all at an early age, side by side with the doctrines and catechism of our especial religious sect. The nation at large has a faint idea that it could get along without any one religious body, but it has a firm conviction that the Monroe doctrine is the sine qua non of America.

Now the plan is for America to take her part in a wider world and become a member of the League of Nations. She is willing to do this and to help ensure peace upon earth if that is a possibility. But she does not want to emulate the dog of the fable and drop a known and sure good in reaching out for a problematic greater and indefinite one.

The League of Nations for America and the world so far, so good. But first and foremost, a renewed recognition of the Monroe doctrine to safeguard the interests of America.

Three different opinions are advanced in the peace conference as to the nature of damages for which Germany should pay indemnities. But no one either in the peace conference or in the whole world doubts the obligation of Germany to pay indemnities of some kind.

Society note:—The president of the United States has recently paid a brief visit to this country.

The seventeen-year locusts are due again this year. How surprised they will be when they learn that in their absence there has been a war.

If the Bolsheviks and labor disturbers and other elements of unrest would kindly take a short nap until the rest of us could get the world into running order again, they would confer a favor.

Pugnacity of the "War Babies" of Europe Stand in Way of Permanent Treaty.

## MANY OF THEM SEEING RED

Open Warfare Would Result if the Peace Terms Were Discussed in the Public.

(By United Press)

Washington, Mar. 14.—The pugnacity of the "war babies" of Europe—those nations which have come into being or hold the reins of freedom as a result of the war—is the main obstacle in the path of President Wilson's first peace point—open diplomacy.

Because of the feeling between the Czechoslovakians and the Italians; the Czechs and Poles; Poles and Germans; Poles and Russian Bolsheviks, to say nothing of other embroilios about which less is known and still less can be written at this time, the problem of open covenants openly arrived at presents its hazards.

The chief danger is discussion in the open of territorial readjustments. With many of these small nations now "seeing red", it is pointed out that open warfare might spring up in the heart of Europe again if the peace conference were to deliberate on the readjustments publicly.

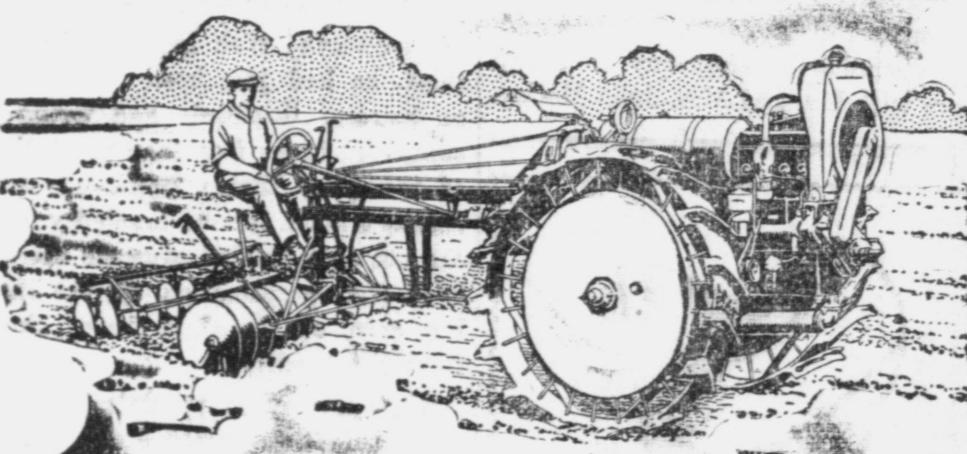

President Wilson himself indicated the situation when the allied press in Paris were fighting for open sessions of the conference. It was his view, supported by the other allied statesmen then, that it would piecemeal the discussions of boundaries. They held that all boundaries must be completely settled before any could be announced because, in reestablishing boundaries, most of Europe is involved in disputes over which, at some points in the interior, actual fighting is now going on. Only by waiting until the whole program is worked out, it is claimed, can it be shown that, where one nation is forced to give up a disputed territory, it may profit otherwise and the petty wars be avoided.

ONE MAN OPERATES BOTH TRACTOR AND IMPLEMENT

One Man Discs 27 Acres a Day with the New

MOLINE  
UNIVERSAL TRACTOR

It Solves The Farm Help Problem

Discing is rapidly and economically done with the new Moline-Universal Tractor, Model D, one man with an 8-foot tandem disc harrow covering 27 acres in ten hours. With a 10-foot disc harrow he covers 38 acres, and with a 20-foot peg-tooth harrow 76 acres.

The light weight of the Moline-Universal Tractor, 3,390 pounds, makes it especially adapted for discing and similar work, as it does not pack the soil and uses but little fuel, running on less than half throttle most of the time. It is light, but more than enough power to pull two 14-inch plows at high speed, all its weight being traction weight.

The Moline-Universal Tractor attaches directly to the implement and forms a single, compact unit with that is controlled by the operator from the seat of the implement, where he must sit to do good work. One man with the Moline-Universal does as good work as two men with the average tractor.

The Moline-Universal is adapted for all classes of farm work. Its high

clearance, 29½ inches, makes it ideal

for cultivating, and it is equally well fitted for planting and harvesting. In addition, it has ample power for belt work, pulling a 24-inch grain separator or 16-inch ensilage cutter with ease.

There is work on the farm every day in the year for the Moline-Universal Tractor. It will do every field operation that can be done with horses and do it better, faster, and cheaper. This is why the Moline-Universal really replaces horses, and, at the same time, by enabling one man to do much more work than ever before possible, solves the farm help problem.

The detailed construction of the new Moline-Universal, Model D, is the best it is possible to manufacture. Perfected 4-cylinder overhead-valve engine, electric starting and lighting system, complete enclosure of all working parts, and fifteen Hyatt roller bearings, are a few of the main features.

We invite you to examine this machine at your earliest opportunity.

the team. He had never missed a game here this year and has followed the boys most of the times they have played out of town. Coach Curtiss was the next speaker. At the meeting before, he said the team was going to Franklin with blood in their eyes. Well—they did, and according to him no team ever fought harder. Other members and teacher and members of the school were called upon and then the meeting closed with several yell. The nature of the talks had been more of a farewell to the team so there was not much "Pep" in the yelling.

At noon assembly period Evans-List Miller from the Methodist church gave a short talk. He invited the whole school or as many as wished to attend the services in a body Wednesday evening. Quite a few attended and were seated in the section reserved for them.

Rushville had a fair record this year, considering that she won 16 out of 24 games played. All of the regulars were together in but nine games the whole season and only two of these games were lost. Rush-

ville has scored 707 points to 472 for the opponents.

Rushville fans are regretting that out of 7 men 6 of them are seniors. The last time that they will be seen in action is next week when the seniors, composed of Keating, Caron, Tompkins, Norris, Becker, and Dill, will stack up against a combined team of sophomores and the faculty. The latter team will probably be Headlee, Miller, Morton, Curtiss, Sloan and Medsker.

The game between Rushville and Franklin last Saturday was the climax to a successful season for the team in spite of the fact that they were defeated in the last game. We can say this much, it was the first time in the history of the school that a Rushville team went into the finals.

The Boosters club is arranging a banquet for the team next week. They promise to have lots of eats and "prepared speeches". The meal will be served by the ladies of the Christian church in the church basement.

### A STITCH IN TIME

Rushville People Should Not Neglect Their Kidneys.

No kidney ailment is unimportant. Don't overlook the slightest backache or urinary irregularity. Nature may be warning you of approaching dropsy, gravel or Bright's disease. Kidney disease is seldom fatal if treated in time, but neglect may pave the way. Don't neglect a lame or aching back another day. Don't ignore dizzy spells, headaches, weariness or depression. If you feel you need kidney help begin using the reliable, time-tried remedy, Doan's Kidney Pills. For 50 years, Doan's have been found effective. Endorsed by Rushville people.

Mrs. Joseph Doll, W. Third St., Rushville, says: "At times my back was so weak and lame I had to stay in bed. It also ached intensely and my kidneys were very irregular in action. Every time I have been this way, I have used Doan's Kidney Pills, procured at a local drug store, and they have never failed to relieve me after taking a few boxes."

Price 60 cents at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Doll had. Foster-Milburn Co., Mfgs., Buffalo, N. Y.

— the Kitchen Cabinet that saves miles of steps

## No more late engagements for Hoosier housewives

**I**N the Hoosier, science has bridged the gap between necessary kitchen work and the social and recreation hours that women must have in order to maintain physical and mental fitness.

The Hoosier, with its 40 labor-saving inventions and work reducing conveniences, cuts kitch-

### The Joy of Motherhood Told

Women Tell How They Made Event One of Great Happiness.

In every part of the land there are women who tell how, through the application of Mother's Friend, they entirely avoided the suffering usually incident to motherhood. They relate in no uncertain terms how from its use the days were made bright and cheerful and the nights long and restful, how the crisis was passed without the usual suffering experienced when nature is unaided, and how they preserved their health and strength to devote it to the rearing of their children and to the things life holds for them.

Mother's Friend is a most penetrating remedy, prepared especially for expectant mothers, and for nursing mothers, physician. Strain upon the ligaments is avoided and instead of a period of discomfort and constant dread it is a season of calm repose. The hours at the crisis are less, and Mother's Friend enables the mother to retain her natural grace, and her skin is not cracked and does not become hard or disfigured.

Write to the Bradfield Regulator Company, Dept. L, Lamar Building, Atlanta, Georgia, for their Motherhood Book, and obtain a bottle of Mother's Friend from the druggist today.

## Presbyterians to Raise Forty Million Dollar Fund for Local, National and Overseas Work.

### Proclamation

#### FELLOW-PRESBYTERIANS:

A momentous hour has struck. The shadow on the dial marks a time of destiny for individuals, institutions and nations.

We must re-establish our altars as Abraham of old, and keep perpetually burning thereon the incense of a robust faith.

We must enter into all life and weave into its filament and fiber mercy and justice. Literature we must chasten; commerce, convert; politics, save; labor and capital, wed in the service of the common brotherhood; art, purify; society, democratize and sweeten; and religion, reveal as man's supreme asset.

At a time when empires are crumbling, and the wild wrath of wronged peoples flames forth against law and order, is it not our duty to make the Church's ministers serve humanity? Shall we not get under the Church's burdens, behind its tasks and into the midst of its struggles for the healing of the nations? Shall we bear the mark of Cain because our indifference has slain multitudes? Shall we live for ourselves and think for ourselves when heroes and martyrs have died for us?

In this hour of the recovery, reconstruction and regeneration of the world every Presbyterian should enlist in the New Era Crusade, invest generously in its great program and enter expectantly and resolutely into its Easter harvest season.

A God and Father inexhaustible in resources, a Divine Christ calling us to follow in His steps and a blessed Spirit for guidance and power, make the whole program attainable.

If we are true to our trust we shall have a revived Church, a restored faith in its mission, an ingathering to the joy of men and angels.

A past, heroic; a present, with a mighty imperative; and a future, whose prophetic beams already announce the coronation of the spirit of service and sacrifice, inspiring hope.

Let every Presbyterian sound forth the slogan "Over the Top to Victory and the Joy of an Immortal Achievement."

In the year of our Lord Nineteen Hundred and Nineteen.

Moderator's Proclamation Read in Every Presbyterian Church in this country on Sunday, March 2, and Displayed on Posters, Opening the Drive for Funds.

PROGRAMS prepared before the war are as useless as a last year's bird's nest—and this applies to the work of the Church just as much as it does to any other kind of an organization which deals with human relationships.

The New Era Movement of the Presbyterian Church was organized to study the conditions which have come out of the war and then to set up an adequate program that will frankly face the facts.

The financial "drive" is being organized by business men who were among the most successful workers in Liberty Loan, Red Cross, War Savings Stamps, Y. M. C. A. and the other war time "drives."

Leading preachers all over the country are leaving their important churches for the sixty day period of the Campaign, becoming responsible for certain areas, seeing to it that these are thoroughly organized for the final rally.

Among the objects for which the

forty million dollars are to be spent are the following:

Half a million dollars for use among returning soldiers and sailors, to whom assistance is also to be given in finding jobs and in getting a new start in life.

Half a million dollars for reconstruction work in building Protestant churches in Europe devastated by the war.

Four million dollars for work overseas, where last year Presbyterians conducted 175 hospitals and dispensaries, in which 700,000 patients were treated and where educational institutions and religious services were maintained, which were attended by many millions of natives.

Eighty thousand dollars will be used for temperance and prohibition work, especially in foreign lands, in which American brewers and distillers are to begin operations as soon as their plants are closed down in this country.

Nearly a million dollars will be appropriated for disabled preachers, and

another million will be used to increase preachers' salaries.

About three millions are needed for special work in American cities and among immigrant populations and lumberjacks and for work among Indians, Mexicans and other depressed peoples, and for relief work in the sparsely settled sections of the country.

Presbyterian women are to raise nearly two million dollars for educational and social work in this country.

Half a million will be used for building new Presbyterian churches and another half million for educational and religious work among negroes.

Nearly a million is to be spent for general religious education and theological training, half a million for Sunday School work and religious literature and about one hundred thousand for special men's work and general evangelism.

Twenty-five million dollars will be spent by the local Presbyterian churches for their general community work.

Garden crops are divided by United States Department of Agriculture specialists into 4 groups with respect to planting the seeds or setting out the plants.

Group 1 (may be planted two weeks before last killing frost). Early cabbage plants from hotbed or seed box, radishes, collards, onion sets, early smooth peas, kale, early potatoes, turnips and mustard.

Group 2 (may be planted about the date of the last killing frost). Beets, parsnips, carrots, lettuce, salisbury, spinach, wrinkled peas, cauliflower plants, celery seed, onion seed, parsley, seed corn, and Chinese cabbage.

Group 3 (should be planted two weeks after last killing frost). Snap beans, okra and tomato plants.

Group 4 (can not be planted until ground is well warmed up, about a month after last hard frost). Lima beans, pepper plants, egg plant, cucumbers, melons, squash, and sweet potatoes.

## Starving in the Midst of Plenty

### Acid-Stomach Steals Strength and Good Feelings From Millions

One of the worst features of acid-stomach is that very often it literally starves its victims in the midst of plenty. And the strange thing about it is that the people with acid-stomachs seldom know what their trouble really is.

No matter how good or wholesome the food may be, or how much they eat, they do not gain in strength. This is clearly explained by the fact that an acid-stomach cannot properly digest food. Instead of healthy, normal digestion, the excess acid causes the food to sour and ferment. Then when this mass of sour, fermented food, charged with excess acid, passes into the intestines, it becomes the breeding place for all kinds of germs and toxic poisons, which in turn are absorbed into the blood and in this way distributed throughout the entire body. And that is exactly why it is that so many thousands of people eat and eat and keep on eating and yet are literally starving in the midst of plenty. Their acid-stomachs make it absolutely impossible for them to get the full measure of nourishment out of their food. And it doesn't take long for this poor nourishment to show its ill effects in a weakened, emaciated body.

You may say: "My stomach doesn't hurt me." That may be true because many victims of acid-stomach do not actually suffer stomach pains. Then again, there are millions who do suffer all kinds of aches and pains—headaches, rheumatic twinges, gout, lumbago, pains around the heart and in the chest—who never dream that an

acid-stomach is the real cause of the trouble.

Naturally, the sensible thing to do is to strike right at the very cause of this trouble and clean the excess acid out of the stomach. There is a quick, easy way to do this. A wonderful new remedy quickly removes the excess acid without the slightest discomfort. It is EATONIC. Made in the form of tablets—they are good to eat—just like a bit of candy. They literally absorb the injurious excess acid and carry it away through the intestines. They also drive the bloat out of the body—in fact you can fairly feel it work. Make a test of EATONIC in your own case today. Get a big box of EATONIC from your druggist. See for yourself how surely it brings quick relief in those painful attacks of indigestion, bitter heartburn, belching, disgusting food repeating, that awful bloated, lumpy feeling after eating and other stomach miseries. Banish all your stomach troubles so completely that you forget you have a stomach. Then you can eat what you like and digest your food in comfort without fear of distressing after effects.

If EATONIC does not relieve you, it will not cost you one penny. You can return it to your druggist and get your money back. So if you have the slightest question about your health—if you feel you are not getting all the strength out of your food—if you are not feeling tip-top, ready for your work, full of vim and vigor—do give EATONIC a fair trial this very day and see how much better you will feel.

### ALLOWANCE TO CHILD IS ROAD TO ECONOMY

Home Economics Expert Says Way Is to Teach Youth Early Proper Apportioning of an Income.

"The best and most natural way of beginning true national economy, wise spending and wise saving," says Ruth Wardell, head of the home economics department of the University of Iowa, and who last summer started a home economics department in a Cleveland (Ohio) bank, "is by giving the children an allowance. The lesson

of properly apportioning an income thus is early learned."

Miss Wardell favors the allowance arrangement at a very early age, say at six or seven. It may then be very small, and out of it the budding citizen may be expected to provide only school pencils, tablets, etc. The purchase of school books provides a logical next step; a little later some personal belongings, such as shoes, may be added.

"I say shoes," explains Miss Wardell, "because children seem to take more interest in shoes than in most articles of wearing apparel, and be-

cause shoes represent a highly important item to which children frequently pay little heed."

The allowance should provide a little margin to encourage careful buying and saving possibilities. It should not necessitate so much care or thought as to burden the growing youngster. It should never, under normal circumstances, be "helped out" by irregular gifts or expected to cover other than the recognized items. The allowance, with its purchasing responsibilities, should be increased gradually, steadily. By the time high school is reached the boy or girl should be buying practically all his or her own clothes.

Miss Wardell tells an interesting story of a boy who called upon her in Cleveland, telling her of his manner of apportioning the rather generous allowance made by his father. He knew to a penny what every article he wore had cost him; he was intelligent regarding relative textile and wearing values; he saved steadily, systematically, with joy.

Get Dr. Edwards' Olive Tablets

That is the joyful cry of thousands since Dr. Edwards produced Olive Tablets, the substitute for calomel.

Dr. Edwards, a practicing physician for 17 years and calomel's old-time enemy, discovered the formula for Olive Tablets while treating patients for chronic constipation and torpid livers.

Dr. Edwards' Olive Tablets do not contain calomel, but a healing, soothing vegetable laxative.

The child's allowance, it may be added, should be for necessities mainly, with but a fair and modest margin for personal luxuries and pleasures. It should always be recognized as allowing for a regular proportion of savings, preferably invested in governmental securities. It should be carefully adjusted, rigidly adhered to on both sides of the bargain. Such respect and observance not only will teach the child good economic habits, but will abolish many too frequent annoyances for the financial head of the family.

Each child given an allowance will understand that this sum, with his support and other parental provisions, represents his fair share of the family income, and that, as decent citizen, he must not ask nor expect to exceed it. An adequate allowance system, moreover, will obviate the evil habit of crying or pleading for special indulgences and more funds.

### BILLIONS FROM THE NICKELS

Ever Stop to Think of Vast Sums That Can Be Saved From Small Amounts?

If every person in the United States saved a nickel in one day it would mean that at night the people would be just five million dollars richer. And then suppose the people kept this up for one month? It would mean that at the end of thirty days they would have saved one hundred and fifty million dollars.

Why not keep it up for the rest of 1919? What would be the result? One billion five hundred million dollars. Sounds like a lot of work for one little nickel to do, doesn't it, yet there are scores of industries in the United States which are paying big dividends on the little nickels gathered day by day.

This immense sum if invested in War Savings Stamps would earn for the savers approximately sixty-four million dollars in 1920—the work of "old man interest," who never takes a day off and who is continuously on the job.

Keep the Money Saved. Thrift means saving money and keeping it saved. Patriotism does not mean enthusiasm today and indifference tomorrow. Buy War Savings Stamps and hold them. No man's duty is fully done when he purchases the securities. He must hold them.

### GARDEN GIVES A LIFT.

A garden gives the game a lift, And helps us practice ways of thrift, That give us seeds from which we grow War Savings Stamps that earn us "dough." So with a garden toll to save, That you may never be a slave, But keep on adding to your wealth, Your peace of mind and ruddy health.

## PAINS AND ACHEs YIELD QUICKLY TO SLOAN'S LINIMENT

Are you tormented by Neuralgia, Lumbago, Sciatica or any of those aches that require a counter-irritant? Then let the soothing, warming application of Sloan's Liniment stop the pain by drawing the blood away from the congested part.

It is the pressure on the nerves by the blood rushing to the inflamed muscle or joint that makes you ache. So when Sloan's Liniment relieves the swollen blood vessels by setting up a counter-irritant on the surface, the

circulation is equalized, sympathetic nerves all soothed, and soreness or lameness disappears.

Sloan's Liniment is probably the counter-irritant most widely used to overcome painful inflammation in cases of neuralgia, sore muscles, wrenched joints, strains, bruises, gout. Rubbing is not required. This clear, clean liquid is easily applied as it does not stain the skin.

#### GETTING A PLANT READY FOR GROWING OUTDOORS

This boy is cutting the bottom out of the strawberry box, in which seeds have been planted, so that he may set the plant, with its ball of dirt, in the ground. The seedling, having received a good start indoors will develop quickly into a vigorous early plant when set in the garden.

Berryboxes are used by many home gardeners to start early vegetables. Others use "flats" or window boxes, and gardeners who grow plants on a larger scale prefer cold frames or hotbeds.

Plants grown under protection from the chilly weather should be hardened off before they are transplanted to the garden, say United States Department of Agriculture specialists. This can be accomplished by ventilation and exposure to outdoor conditions during fine days. By the time danger of frost is past and the plants are large enough to be transplanted to the garden they should be thoroughly accustomed to outdoor conditions.

#### France Gives Aid To America.

The pouring out of French blood and the enormous financial sacrifices are not the only aid France has given America. We are indebted to the French peasants for a perfect remedy for stomach, liver and intestinal ailments which has not only been marvelously successful over there, but has been equally so over here. The ingredients are imported and put up for sale in this country by Geo. H. Mayr, for many years a leading Chicago chemist, under the name of Mayr's Wonderful Remedy. It is a simple harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded. For sale by Druggists Everywhere. (Adv.)

George Meyer spent a few days last week as the guest of relatives in Cincinnati. The Misses Clara, Grace and Belva Carson and Opal, Marie and Edith Kiser spent Sunday with Mr. and Mrs. Donald Kiser. Mr. and Mrs. Clem Hall visited Mr. and Mrs. Wayne Werking Sunday. Mrs. Will McMillin spent Thursday with her mother, Mrs. Joseph M. Bell. **SAVING TO STABILIZE BUSINESS OF COUNTRY**

Systematic Buying and Elimination of Waste Lead to Prompt Payment of Bills and Happiness.

American thrift will go far to save the life of the world, to bring liberty and to make the pursuit of happiness possible to oppressed humanity. Periodically in the United States there have come times of financial depression; production has exceeded consumption; factory doors have closed; workers have found themselves without money and the retailers who serve them have faced the gloomy alternative of refusing credit and going out of business because of lack of trade, or extending credit and going to smash because of lack of funds. The store closes its doors and immediately other stores, even those competing, feel the unwholesome influence. Panic spreads just as surely as when there is a run on a bank and failure stares many merchants in the face.

Now the more thrifty the people of a community are the more promptly they pay their bills, and the more promptly bills are paid the more remote becomes the possibility of failure. If every worker is a systematic saver, with savings made possible by careful, intelligent buying and the elimination of waste, the hard time will be safely bridged and will be tremendously shortened. It is, therefore, good business for the retailer to join in a campaign against impulsive buying and waste. The mechanician who, in flush times, buys an unnecessarily elaborate article, and who, in hard times, repudiates his bills, is not as good a customer as the one who used restraint in his day of prosperity and had a margin for the rainy day. The former undermines business—the latter stabilizes it.

The judicious buyer who exercises care in his purchase also carefully and conscientiously meets his obligations. The man who throws money away treats his bills as "a scrap of paper."

Waste is an enemy of good business. In certain districts of New York investigators found that 11 per cent of the contents of the garbage cans was perfectly good foodstuff. The amount of usable material abandoned in this country every year amounts to millions. The farmer leaves the plow to rust away outside the barn all winter; the housewife overheats the house; the factory worker throws good material on the scrap heap, and all those things make it possible that in the United States today there are 1,250,000 people, whose working days are over, dependent upon charity, individual and county, to the extent of \$220,000,000 a year, dependent because in their earning days they cultivated habits of waste rather than those of thrift.

Education in thrift must be an education in values. That education must extend past the workers of today to the workers of tomorrow. Hereafter more of a youth's precious school hours should be devoted to a consideration of the principles of how to live, how to take a helpful and progressive part in the problems of a workaday world. The biggest lack in this nation is a department which will teach the value of a dollar.

The young man who in school received the proper training in thrift will take account of the use of savings. Savings is worse than useless if the hard-earned accumulations are invested in some of the innumerable gold-brick, get-rich-quick schemes which take millions of dollars out of our communities each year.

The treasury department is confident that no safer and more attractive plan has been offered for the encouragement of small systematic investment than that of War Savings Stamps. If the investor can lay aside but 25 cents a week he has here the means of putting that amount away in a safe security. If he can set aside four dollars and a few odd cents each week that amount begins working for him at a good rate of interest, which, with

**The COMFORTS of the AMERICAN HOME**

It is a well known fact that home for home, the American household has more comforts and conveniences than that of any other nation.

In foreign lands the modernized dwelling is found only in the better sections of the larger cities.

In America, even in remote rural districts, you find the piano, the vacuum cleaner, washing machines, up-to-date heating systems, telephones and numberless electrical appliances.

There is a well-kept look about residence, store or outbuildings with an atmosphere of prosperity and content.

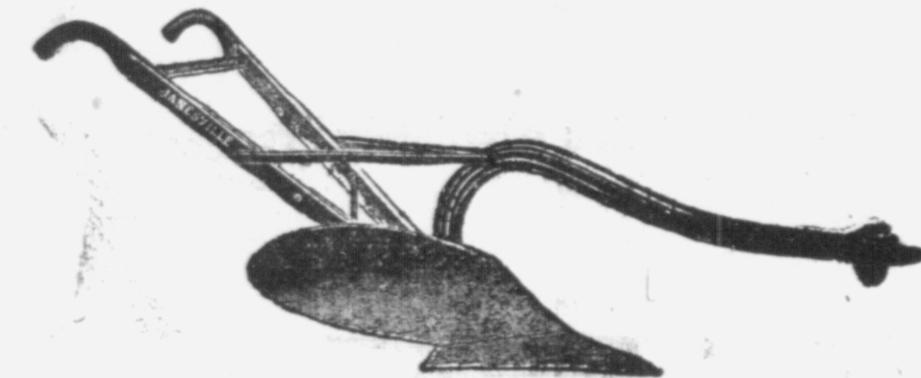

Did you ever stop to realize why this is so; how this condition was brought about?

It is largely due to advertising. And a big share of the credit belongs to newspaper advertising.

Stop and think how many of the foods you eat, the things you wear and other articles entering into your everyday life, you first heard of through newspaper advertisements.

You will then realize what a part they do play, or should play, in your daily life.

Read the advertisements in the newspapers regularly and thoroughly, if you are not already doing so. They mean more to you than you can tell.

**Janesville Walking Plow****What Is Walking-Plow Satisfaction?**

THE handles must be just the right height and swing over far enough in the furrow to allow me to walk squarely between them.

"The plow must run reasonably well without too much draft either to the land or to the furrow.

"The hitch must be such as to allow the tugs to be reasonably long to give the plow plenty of freedom to find itself in the furrow at the depth I wish to plow.

**All This You Get in Janesville S. & S.**

"This freedom in the furrow allows the plow a certain amount of oscillation as it slices the furrow and takes the 'pinch' away from the cutting edge of the share. This lightens the draft and saves me time.

"The quality of the work must be regular and the furrow left in as uniform condition as the character of the soil will permit. This reduces the cost of working it down into a seed bed.

"The long, smooth, easy roll of the furrow over the perfect scouring share and moldboard, and the plow guided by a slight pressure of either hand now and then eases the day's labor for man and team and insures the best work."—A Personal Testimonial. It will do as well for you. Let us prove it.

## GOD SAVED JAPAN FOR THE ALLIES

Earl Rankin Bull, Returned Missionary, Says Christian Civilization Prevented Hun Support

### TALKS AT CARTHAGE CHURCH

Declares Jap Tendency Was All Pro-German Because of Government and German Influence

Earl Rankin Bull, a missionary to Japan delivered a forceful address at the Fletcher M. E. church at Carthage Wednesday night a summary of which follows:

"The Japanese will bet his life that there are 8,000,000 gods pitying the Americans who believe in having only one. The influence of this one Christian God, however, saved Japan for the Allies.

"The elite of Japan have had their first training from the sons of the Kaiser. The best in music, science, military tactics, law, and medicine was given to Japan by the Hun. The autocratic form of government closely resembles that of the German and the natural thing was for Japan to side with her old instructors. However, the presence of the Japanese Christian statesmen, the Protestant body of 101,000, the Christian schools and the ideals held up by the missionaries saved Japan to the Allies in large part. She not only gave her sympathy but her substance to the Allies. She in-

"At home, as a girl, I had no money. Mother bought things for us children with whatever money father gave her. Since I've been married, it's been much the same. I've got things at the town stores and Jim's paid for them. Even my egg and butter money has gone, as a rule, to help with the household upkeep—turned in on the grocery bill, usually. I've never seemed able to hold on to a penny.

"But when the War Savings Stamps came along I said to myself, 'Here's your chance, Mary!' And now I buy War Savings Stamps regularly, take 'em in change as regularly as I sell chickens or cash the creamery check at the bank. ## TO PLACE BUST MILITARY MUSEUM

Fund Started Here in Order to Have  
Gen. P. A. Hackleman Represented in State Collection

### IN BASE OF THE MONUMENT

Recognition Due Only Hoosier General Killed in Civil War—\$11 of \$50 Required Pledged

A proposal to place a life sized bust, in color, of Brigadier General Pleasant A. Hackleman, a Rush county man who was the only Indiana general killed in the Civil War, in a pictorial military museum being established in the base of the state Soldiers and Sailors Monument in Indianapolis, has been received by the Daily Republican from Oran Perry, superintendent of the monument.

Mr. Perry calls on the Daily Republican to raise \$50 to pay for enlarging a photograph to life size, and himself offers to contribute a dollar, because he was intimately acquainted with General Hackleman and served under him as sergeant major.

Before starting the project, the Daily Republican consulted with several local citizens, who believed that no pictorial museum, representing Indiana's part in all wars, beginning with the Revolution, would be complete without General Hackleman represented in it. They feel that it is the duty of Rush county to bear the expense of having a bust of General Hackleman placed in the collection because he was a Rush county man and played a prominent part in the Rebellion, although his services have never been recognized by the state.

Repeated efforts have been made to get appropriations from the state legislature to erect a monument to the memory of General Hackleman, but they have all met with failure.

"It would be an everlasting shame which Rush county could not escape," said one Rushville man yesterday, "if General Hackleman were not represented in the collection, because it is doubtful if any Hoosier played any more prominent part in the Civil War than did General Hackleman."

Members of the Rush county chapter of the Sons of the American Revolution, who attended the state banquet recently, say that Mr. Perry spoke regarding the collection which he is making. They have the utmost confidence in Mr. Perry and say that he will place the bust in the collection if the sum required is raised and placed in his hands. It is assured that an excellent likeness of General Hackleman can be obtained from among his descendants here.

It will be necessary to raise only \$39 as \$11 has already been pledged counting the \$1 which Mr. Perry says in his letter he will contribute. Dr. F. G. Hackleman, president of the Rush county chapter of the Sons of the American Revolution, when

## TRIES HABEAS CORPUS SUIT TO GET CHILDREN

William A. McDonald Alleges That He is Now Prepared to Care for Them Properly.

### ARE IN KNIGHTSTOWN HOME.

The first habeas corpus suit in the circuit court for many years was filed today when William A. McDonald of Connersville instituted proceedings to get the custody of his four minor children who are in the State Soldiers and Sailors Orphans home in northern Rush county, near Knightstown. The superintendent of the home, Luther Short, and David Strouse, D. L. Mustard and Ida L. McBride, trustees, are made defendants.

McDonald sets forth in the complaint that the superintendent and trustees are unlawfully and without cause holding his children, who were placed in the home November 1, 1916 by an order of the Rush circuit court, because McDonald was found not to be a fit person to have the custody of the children. He avers that he is now able to care for them; that he has fitted up a home at 105 Eastern Avenue at Connersville, and employed a housekeeper.

The children whose custody he seeks are: Helen 12, Hazel 10, James 8 and Josephine 6.

## NOTIFIED MEN MAY KEEP THEIR UNIFORMS

County Army Selection Board Receives Official Notification From State Officer

### MAY WEAR UNIFORMS AT WILL

The county army selection board has been officially notified that any person who served in the United States navy, marine corps or army, upon honorable discharge and return to civil life, may retain a complete uniform. The notification came in the form of a telegram from Robert C. Baltzell, state conscription officer, quoting an act of congress.

The matter of retention of uniforms by soldiers, sailors and marines returning to civil life has been unsettled and discharged men were up "in the air" figuratively speaking, until arrival of the latest official order, which definitely settles the subject. The one uniform referred to according to the congressional act, consists of one complete suit of outer uniform clothing, including the overcoat and such articles of personal apparel and equipment the men may have. The order also permits the discharged men to wear such clothing at will.

## PRIEST TO GIVE BOARD'S VERSION

County Assessor Calls Township Assessors and Their Deputies For Meeting Tomorrow

### LAND VALUES MUST BE RAISED

He Says Real Estate and Improvements Should Average From \$135 to \$140 an Acre

Township assessors and their deputies have been called to meet tomorrow morning at ten o'clock in the court house when Earl Priest, county assessor, will explain the provisions of the new tax law, as they were set forth at the first of a series of conferences conducted by the state tax board in Indianapolis Wednesday.

Mr. Priest says that the earlier prediction that the appraised value of land and improvements should average about \$125 an acre in this county, will have to be revised. He estimates—and he will so tell the taxing officials tomorrow—that the taxable value of farm land and improvements will have to average between \$135 and \$140 in order to meet with the provisions of the new law, as interpreted by the state board.

Furthermore, Mr. Priest says, the simple expedient which some assessors and their deputies have adopted, of simply doubling last year's appraisement of household goods, will have to be changed because adding a hundred percent to last year's valuation on most household goods will not bring very many near the actual cash value.

Mr. Priest will make it plain to the assessors that there is no other alternative for them—they must enforce the new law to the letter and show no favoritism. If all classes of property are not taken at their true cash value, the state board has two courses of action, either one or both of which may be followed.

The new law gives the state board the power to remove any assessor, be he county or township official or deputy, if, in the opinion of the board, he is not enforcing the law.

Furthermore, the board may order the reassessment of any individual or any unit up to and including a whole county, or may raise the total valuation equally, a certain percent, in any taxing unit, if the appraised value is not high enough. An assessor or deputy assessor who may be removed from office by the state board, is given the privilege of appealing his case to the circuit court for a hearing.

Mr. Priest will urge upon the assessors the necessity of following the law because if the state board, for instance, should find it necessary to raise the assessment in any township, or the whole county, some hardship would result due to inequalities in taxation, because the same percent of increase would be added to each individual's valuation. The injustice would result because some valuations would be higher proportionately than others.

Another reason for taking all classes of property at their true cash value will be outlined by Mr. Priest. The assessors' attention to this is that the new law does not allow any township or city to have a rate in excess of one and a half cents on the dollar, with certain exceptions. If a city or township has good reasons for making its rate higher, it is necessary to petition the state board for the privilege. The board may refuse or grant the request. If it is granted, the people or petition may submit the question to a referendum vote

## WILSON GREETED BY PRES. POINCARÉ

President's Arrival in Paris Today Sets Machinery of Peace Conference in Motion

### FINAL AGREEMENT IS NEXT

Leaders, in Ratifying Each Detail, Will Draw up Draft of Preliminary Peace Pact

(By United Press.)

Paris, Mar. 14.—President Wilson arrived here from Brest at 12:30 p. m. today.

President and Madame Poincaré greeted President and Mrs. Wilson at the station. While their wives chatted the two presidents inspected the guard of honor. A band played the American national anthem as the train pulled into the station and The Marseillaise as the Wilsons started for their residence accompanied by an escort of cavalry.

With President Wilson's arrival in Paris today the machinery was set in motion for resumption of the preliminary peace treaty.

The scheduled meeting of the supreme war council was cancelled to permit conferences by the president, Premier Lloyd George, Premier Clemenceau and other leaders.

As all details of the treaty have been virtually completed by the various committees, the main problem was that of reaching a final agreement. The leaders, in ratifying each detail, will draw up the formal draft. All indications today showed that the treaty would be finished by Mar. 20 and the Germans called in about March 25.

Whether the league of nations would be incorporated in the preliminary treaty has not been determined. An invitation was sent to all neutrals who have their representatives here, to meet the peace delegates in an unofficial conference before the end of next week, to present their ideas.

Sentiment today seems to favor Geneva as the seat of the capital of the league of nations council.

The supreme war council has reserved settlement of the Turkish-Albanian frontier. The German boundary will be included in the preliminary treaty.

The problem of feeding Poland has narrowed down to the necessity of getting the Polish division from France into their own country to keep railways open.

Basle, Mar. 14.—A Weimar dispatch said: "It has been learned that the government Wednesday appointed German delegates to the peace conference, including Foreign Minister Brockdorff and Dr. Edward David, first president of the national assembly.

The German main argument regarding indemnities will be that if food and raw material are permitted to enter Germany, they will stand a fair chance of paying them; otherwise her imposed obligation cannot be met.

London, March 14.—Delegates to the league of nations society convention left for Paris today to present to the peace conference recommendations for a number of amendments to the covenant. Each delegate will take up the recommendations with a conferee of his country and will urge that the constitution be changed accordingly.

Brussels, Mar. 14.—The allied economic council today presented the German representatives with the new terms for reviving that country which require Germany to turn over her merchant fleet.

### SAYS GOD'S LAWS MUST BE FULFILLED

Evangelist Miller Declares if They're Disobeyed, Only Promises of Wicked Life Are in Store

### SERMON AT THE M. E. REVIVAL

Two United With Church, Making Six Conversions For Meetings Which Continue Another Week

God's laws must be fulfilled to the letter else his promises can not be appropriated, according to Evangelist Miller, in his sermon at St. Paul's M. E. church revival. If His laws are disobeyed, only the promises of a wicked life are in store, he said.

A number by a quartet composed of Mrs. George Hogsett, Mrs. George Wiltsie, Dr. F. M. Sparks and the Rev. Clyde S. Black, was a feature of the song service last night. Two more were united with the church last night, making a total of six conversions since the meeting began about two weeks ago. The revival will continue through next week.

Speaking on "The Two Ends of a String," Mr. Miller took Peter 4:17 for his text, "What will be the end of be of them that obey not the gospel of God?"

He said in part: "To those who profess to believe in the Bible and Christianity, these words are wrought with heart-sickening significance. In fact, the text is a sermon in itself. What will be the end of the man who refuses to obey God?"

"Here God gives me a book that tells me where I came from and where I am going without which, I would not know of my origin and destiny except as I might glean it from the dim outlines of reason and nature, either or both of which would be entirely unsatisfactory to me."

"One of the first things that God instituted and brought in immediate effect following the creation is a thing called 'discipline.' He showed man's superiority over the animal kingdom by giving him dominion over them and then showed his superiority over man by putting in his hands a set of laws governing his conduct in this world, making him amenable to the laws of the creation which, on account of finite minds not being able to read the future, was an absolute necessity to insure our prosperity here and hereafter.

"In order that everything may work out according to God's pre-arranged plan, it is very obvious that His laws must be fulfilled to the letter. All men recognize the all powerful hand of God in ruling the affairs of his own creation."

"If I obey the laws of God, I can appropriate His promises to my life. If I disobey Him, I must surely appropriate the promises of a wicked life. A study of plants and the immensity of some of them almost makes the head swirl and fairly

## FAMOUS PLAYER OF BAGPIPES IS COMING

Charles O'Donnell Will Offer Feature Attraction at St. Patrick's Day Celebration Monday

### INSTRUMENT MADE BY HIM

One of the special attractions at the St. Patrick's day celebration, which will be held in the hall of the Catholic church next Monday evening, will be Charles O'Donnell and his bagpipes. The pipes which Mr. O'Donnell uses were made entirely by himself as the original makers of the pipes in Ireland are fast dying out.

The bagpipes will soon become an obsolete instrument, it is said. Most of the tunes played by Mr. O'Donnell are traditional, and have never been written but have always been played by ear. Many of the tunes are the ones he heard from his father in Ireland many years ago and have never been played by anyone else.

The Irish bagpipes differ a great deal from those of the Scotch. Mr. O'Donnell explains. They are played in a sitting position and the air is supplied to the pipes by a bellows which are pressed by the arm as the pipes are played. They have seven pipes while the Scotch have five. They are also more of a concert instrument, as they are tuned in concert pitch, and are of a softer tone than the Scotch bagpipe.

Mr. O'Donnell goes each year to Chicago to attend an annual gathering of bagpipe players. He has collected more than 1800 Irish tunes and his visit here is considered a rare treat.

## AMERICAN SOLDIERS AND JAP POLICE CLASH

State Department Makes Short Statement in Absence of Complete Details of Affair.

### MAY HAVE BEEN NIGHT BRAWL

Washington, Mar. 14.—A clash between some American soldiers and Japanese policemen and civilians at Pien Psin occurred last Wednesday and Thursday, a state department dispatch announced today. In the absence of complete details of the affair, the department confined itself to a short statement embodying the information that the incident is being investigated.

The fact that the clash took place, according to the dispatch, on Wednesday and Thursday, would indicate that it was a night brawl or a series of small fights, the department statement said.

## FIRST BATTLE WAS AT MARKET CONTINUES THE ST. MIHEL SECTOR TO HOLD STEADY TODAY

Ralph Pea Writes That All the Former Company B Boys Who Are With Him Are Well.

### ARE WANTING TO COME HOME

Mr. and Mrs. Elsbury Pea have received word from their son Ralph, who is now in Luxembourg with the 124th Field Artillery. There were seven of the former Company B boys together at the time of writing, Edward Black having been returned to the company, after having been wounded at St. Mihiel. The letter in part is as follows:

"Our first fight was at St. Mihiel. About a year ago the French and English lost about 30,000 men in taking this hill and then lost it. Our doughboys took it in about an hour. They went so fast that we had to advance twice to keep in range with the artillery. The infantry had very few casualties in this drive. At the Argonne drive we started the fight on the 26th. We followed the infantry so close that we could see the doughboys advancing on a hill just about a half mile in front of us. We were firing for the 91st division. All the fellows that are here from home are well as far as I can find out. We received our first casualties at Romange, two gun crews having been completely wiped out. They had a good observer and had a direct range upon our guns. You can talk about your artillery, we sure had some there, all kinds and sizes that anyone could mention. We have advanced since then, almost to Coblenz, where the army of occupation is stationed, but will not get to go much farther."

He closes stating that he is well and is in hopes of returning to the States and home before very long. He also states that they have a very good time there and are receiving their pay regularly.

### GREENCASTLE IS DEFEATED

Lafayette, Ind., Mar. 14.—Approximately 6000 basketball fans today looked forward to the Thorntown-Huntington game which is the first game on tonight's schedule.

Since the burst of speed and team work on the part of Thorntown five yesterday when they beat Anderson, it was thought likely that they would take the game tonight.

In Greencastle's defeat at the hands of Rochester in the first game today by the score of 16 to 8, the latter team is slated to oppose Columbus in the final game of tonight. Columbus is favored over Rochester.

For the second game scheduled the score was Jeffersonville, 22, Martinsville 16.

In the third game at 11 o'clock the score was Emerson of Gary 33 and Kendall 13.

The tractor demonstration held at the Hackleman farm, west of the city, Wednesday and Thursday was brought to a close yesterday at 4 o'clock, when the two fields being plowed were finished in "shipshape." Nine different styles of tractors took part. In addition to plowing some of the tractors did belt work or pulled discs and prepared a seed bed. At least twelve hundred people attended the demonstrations and a good interest was shown in the tractors, which are growing in popularity in this county.

### SUCCESS NOT FOR LEANERS

Man That Wins in Life's Struggle Must Have the Utmost Confidence in Himself.

Power is the goal of every worthy ambition, and only weakness comes from imitation or dependence on others. Power is self-generated. We cannot increase the strength of our muscles by sitting in a gymnasium and letting another exercise for us.

Nothing else so destroys the power to stand alone as the habit of leaning upon others. If you lean you will never be strong or original. Stand alone or bury your ambition to be somebody in the world.

The man who tries to give his children a start in the world so that they will not have so hard a time as he had is unknowingly bringing disaster upon them. What he calls giving them a start will probably give them a setback in the world. Young people need all the motive power they can get. They are naturally learners, imitators, copiers, and it is easy for them to develop into echoes or imitations. They will not walk alone while you furnish crutches; they will lean upon you just as long as you will let them.

One of the greatest delusions that a human being could ever have is that he is permanently benefited by continued assistance from others.—Orison Swett Marden, in Success.

### AIM SHOULD BE PERFECTION

Man Who Is Satisfied With Nothing but the Best Is Man Who Will Make Good in Life.

Don't get into the "that's-good-enough" habit. Nothing short of "perfect" should be your motto.

Slovenly habits of mind and hand grow faster than good habits. A slipshod manner of thinking results in slipshod methods of work.

You will never become efficient in any one thing till you get it firmly fixed in your mind that if another can do it better than you you are not doing well.

Thoroughness and accuracy play a big part in the success or failure of the individual.

You may be artistic and temperamental and dreamy, but you will never realize your dreams till you get down to brass tacks and do what you do with precision and dispatch.

There is plenty of time to exercise your artistic moods after you have learned all there is to know of the mechanical and fundamental principles of the work or accomplishment you think you are up to do.

Remember that interpretation comes last.

There must be weeks, months and years of systematic and consistent drill before one is capable of exercising the faculty of interpretation.

## Picture Fairbanks' Ambition

The fact that "Arizona" was picturized four years ago, by its author, Augustus Thomas, did not discourage Douglas Fairbanks from doing it himself and reviving the attractive character of "Lieutenant Denton." It was shown at the Princess theatre last night and will be shown again today.

Like the typical Shakespearian actor that he is, Douglas has been spouting the lines of "Arizona" to such an extent that his office staff have found it necessary to memorize cues, and sacrifice their routine labor to "act out" with Fairbanks.

Ever since he first saw the play "Arizona" it has been his dream, his one great ambition—to produce it, and when the opportunity arrived to do it, it was happy day for Douglas Fairbanks.

An all star cast was organized which includes Theodore Roberts, Marjorie Daw, Frederick Burton, Kathleen Kirkham, Frank Campeau, Marguerite de la Motte, Kate Price, Robert Boulder, Raymond Hatton and Albert McQuarrie. The latter appeared with Mr. Fairbanks in "He Comes Up Smiling" and "Bound in Morocco." This is said to be as fine a cast as has been assembled in any motion picture.

## The Bride's Awakening

"The Bride's Awakening," in which Mae Murray takes the leading role as Elaine, will be the offering at the Mystic theater tonight. Tom Mix is advertised for tomorrow in "Roman Cowboy." The following brief summary of the story of the photoplay for tonight gives an insight into the dramatic situations which are developed:

"If I thought you did not love me, as you say you do, I would shoot you and then myself." Which was quite annoying to Richard Earle. In the first place he was tired of Mrs. Bennett; in the second, he never had any intentions of "flying to the ends of the earth" with her; and in the third, he had just been married to an heiress. Richard had virtually supported himself on the expectation of marrying Elaine Bronson, and Elaine trusted him so implicitly that she not only handed over the checkbook and combination to the safe but even consented to keep their marriage a secret.

This precaution was also Earle's undoing. It premitted Jimmy Newton to fall desperately in love with Elaine, and when Earle told Jimmy that she was his wife and not his ward, Mrs. Bennett was hiding in his room behind the curtain, expecting to escape with Earle. It was a desperately strained situation and its tension was broken by a revolver shot.

told of the offer, said that he would contribute \$5. Earl H. Payne, who likewise has been active in the Sons of the American Revolution organization, having twice been state president and once state trustee, stated that he would give a similar amount.

Mr. Perry's letter making the proposal is as follows:

We are establishing in the base of the Monument a pictorial military museum, representing Indiana's part in all wars from the Revolution down. Of all men I knew in the Civil War, General Hackleman deserves a place where his memory will be kept green.

If some one has a photograph of him in Brigadier General's uniform, I can have it enlarged to life size bust, in color, and placed in a handsome frame 30x40 inches for \$50.00.

Will the people of Rush County furnish me the money and trust me to do the rest.

I am not a Rush County man but Hackleman was my Colonel and I was his Sergeant Major.

I will start the subscription with \$1.00 if you, through your paper, will raise the other \$49.00.

bankrupts mathematics in the use of figures.

From the largest planet to the smallest insect, each and everything is obeying God's law and it is well that they did or man would find himself destroyed by the forces of nature which surround him.

Some people say I prefer to hear you preach the love of Christ. That is what we are doing now. As I show you God's law and its inflexibility, I also show you His mercy. Some of you folks talk about God's

love. You don't love God, many of you don't. If you loved Him, you would keep His commandments. Others don't even appreciate God. If you appreciated Him, you would not take His name in vain or speak disparagingly against the church. He instituted.

It was the inflexibility of God's law that caused Him to offer up Jesus, His only son, in order to keep His law in making His word sacred and still made provisions to save rebellious sinners. The tragedy of the cross was prompted by God's love and made necessary by your willful disobedience.

There are always two ends of everything, with one exception, which is, eternity. Every other thing has a beginning and an end. It was so with this old planet. There

was a time when it was created or spoken into being and the same book informs us there is a day coming when it is going to be, as suddenly destroyed and when that time comes, it will be accompanied by wailing

nations, rending rocks, the moon red as blood while this old planet with all he contained will be a reeling mass of flames, and when that day comes, whether near at hand or afar off, we know not and this old planet shall fall far over in the dark ilimitable space.

"But the end comes suddenly. So it is in nature. Spring is hardly here before we see the signs of autumn. We are in the cradle or nursery one day and in a few days we become decrepit and have one foot in the grave. Death is not the end of man. It is only the beginning of the end. You come into this world with a scream when the air rushes into your lungs and you will go out with a smothered cry of anguish or shout of victory occasioned by what you see just ahead at the end.

"You may stand high socially, financially and politically and your presence may be sought to grace every function but none of these things count with God."

## High School Notes

Monday was quite a talkative day in R. H. S. In the morning at the first period Judge Sparks was the main speaker at the final "Pep" meeting of the basketball season. The programme was arranged especially for the discussion of the team's good work at the sectional tournament but the whole season was looked back upon. Judge Sparks is a very loyal supporter of the team and we can't help but feel proud when such men are back of

the team. He had never missed a game here this year and has followed the boys most of the times they have played out of town. Conch Curtiss was the next speaker. At the meeting before, he said the team was going to Franklin with blood in their eyes. Well—they did, and according to him no team ever fought harder. Other members and teacher and members of the school were called upon and then the meeting closed with several yells. The nature of the talks had been more of a farewell to the team so there was not much "Pep" in the yelling.

At noon assembly period Evangelist Miller from the Methodist church gave a short talk. He invited the whole school or as many as wished to attend the services in a body Wednesday evening. Quite a few attended and were seated in the section reserved for them.

Rushville had a fair record this year, considering that she won 16 out of 24 games played. All of the regulars were together in but nine games the whole season and only two of these games were lost. Rush-

ville has scored 707 points to 472 for the opponents.

Rushville fans are regretting that out of 7 men 6 of them are seniors. The last time that they will be seen in action is next week when the seniors, composed of Keating, Carson, Tompkins, Norris, Becker, and Dill, will stack up against a combined team of sophomores and the faculty. The latter team will probably be Headlee, Miller, Morton, Curtiss, Sloan and Medsker.

The game between Rushville and Franklin last Saturday was the climax to a successful season for the team in spite of the fact that they were defeated in the last game. We can say this much, it was the first time in the history of the school that a Rushville team went into the finals.

The Boosters club is arranging a banquet for the team next week. They promise to have lots of eats and "prepared speeches". The meal will be served by the ladies of the Christian church in the church basement.

## Presbyterians to Raise Forty Million Dollar Fund for Local, National and Overseas Work.

### Proclamation

#### FELLOW-PRESBYTERIANS:

A momentous hour has struck. The shadow on the dial marks a time of destiny for individuals, institutions and nations.

We must re-establish our altar as Abraham of old, and keep perpetually burning thereon the incense of a robust faith.

We must enter into all life and wade into its filament and fiber mercy and justice. Literature we must champion; commerce, convert; politics, save; labor and capital, wed in the service of the common brotherhood; art, purify; society, democratize and strengthen and religion, reveal as man's supreme asset.

At a time when empires are crumbling, and the wild wrath of wronged peoples flames forth against law and order, is it not our duty to make the Church's ministers serve humanity? Shall we not get under the Church's burdens, behind its tasks and into the midst of its struggles for the healing of the nations? Shall we bear the mark of Cain because our indifference has slain multitudes? Shall we live for ourselves and think for ourselves when heroes and martyrs have died for us?

In this hour of the recovery, reconstruction and regeneration of the world every Presbyterian should enlist in the New Era Crusade, invest generously in its great program and enter expectantly and resolutely into its Easter harvest season.

A God and Father Inexhaustible in resources, a Divine Christ calling us to follow in His steps, and a blessed Spirit for guidance and power, make the whole program attainable.

If we are true to our trust we shall have a revived Church, a restored faith in its mission, an ingathering to the joy of men and angels.

A past, heroic; a present, with a mighty imperative; and a future, whose prophetic beams already announce the coronation of the spirit of service and sacrifice, inspiring hope.

Let every Presbyterian sound forth the slogan "Over the Top to Victory and the Joy of an Immortal Achievement."

In the year of our Lord Nineteen Hundred and Nineteen.

Moderator's Proclamation Read in Every Presbyterian Church in this country on Sunday, March 2, and Displayed on Posters, Opening the Drive for Funds.

PROGRAMS prepared before the war are as useless as a last year's bird's nest—and this applies to the work of the Church just as much as it does to any other kind of an organization which deals with human relationships.

The New Era Movement of the Presbyterian Church was organized to study the conditions which have come out of the war and then to set up an adequate program that will frankly face the facts.

The financial "drive" is being organized by business men who were among the most successful workers in Liberty Loan, Red Cross, War Savings Stamps, Y. M. C. A. and the other war time "drives."

Lending preachers all over the country are leaving their important churches for the sixty day period of the Campaign, becoming responsible for certain areas, seeing to it that these are thoroughly organized for the final rally.

Among the objects for which the

forty million dollars are to be spent are the following:

Half a million dollars for use among returning soldiers and sailors, to whom assistance is also to be given in finding jobs and in getting a new start in life.

Half a million dollars for reconstruction work in building Protestant churches in Europe devastated by the war.

Four million dollars for work overseas, where last year Presbyterians conducted 175 hospitals and dispensaries, in which 700,000 patients were treated and where educational institutions and religious services were maintained, which were attended by many millions of natives.

Eighty thousand dollars will be used for temperance and prohibition work, especially in foreign lands, in which American brewers and distillers are to begin operations as soon as their plants are closed down in this country.

Nearly a million dollars will be appropriated for disabled preachers, and

another million will be used to increase preachers' salaries.

About three millions are needed for special work in American cities and among immigrant populations and lumberjacks and for work among Indians, Mexicans and other depressed peoples, and for relief work in the sparsely settled sections of the country.

Presbyterian women are to raise nearly two million dollars for educational and social work in this country.

Half a million will be used for building new Presbyterian churches and another half million for educational and religious work among negroes.

Nearly a million is to be spent for general religious education and theological training, half a million for Sunday School work and religious literature and about one hundred thousand for special men's work and general evangelism.

Twenty-five million dollars will be spent by the local Presbyterian churches for their general community work.

In every part of the land there are women who tell how, through the application of Mother's Friend, they have avoided the suffering incident to motherhood. The results in no uncertain terms show from its use the days were made bright and cheerful and the nights calm and restful, how the crisis was passed without the usual suffering experienced when nature is maided, and how they preserved their health and strength to devote it to the rearing of their children and to the things life holds for them.

Mother's Friend is a most penetrating remedy, prepared especially for expectant mothers, from a formula of a noted physician. Strain upon the ligaments is avoided, and instead of a period of discomfort and constant dread it is a season of calm repose. The hours at the crisis are less, and Mother's Friend enables the mother to retain her natural grace, and her skin is not cracked and does not become hard or discolored.

Woodward attacked a nest of 10 machine guns and a battery of field guns, which were holding up the attack. In spite of the additional hazard of heavy enfilading fire from enemy artillery on the left, he succeeded with his mission. On another occasion he broke up an enemy counterattack

formation by placing an automatic rifle ten feet in an exposed position and disorganized the enemy with a harassing fire. Home address, Mrs. Anna Woodward, mother, New Amsterdam.

(By United Press.)  
\* London, Mar. 1. (By Mail.)  
\* English women who wish to learn to fly will soon have a chance to go to a regular flying school where only women pupils will be accepted.

The school is to be opened shortly near a popular Thames holiday resort. The fee for the full course in flying will be \$625, machine included. Pupils buying a machine will receive instruction free. The faculty will be composed entirely of officers and men of the Royal Air Force.

\* VEGETABLES GROUPED.  
\* FOR PLANTING SEASON  
\*\*\*\*\*

Garden crops are divided by United States Department of Agriculture specialists into 4 groups with respect to planting the seeds or setting out the plants.

Group 1 (may be planted two weeks before last killing frost). Early cabbage plants from hotbed or seed box, radishes, collards, onion sets, early smooth peas, kale, early potatoes, turnips and mustard.

Group 2 (may be planted about the date of the last killing frost). Beets, parsnips, carrots, lettuce, salisbury, spinach, wrinkled peas, cauliflower plants, celery seed, onion seed, parsley, sweet corn, and Chinese cabbage.

Group 3 (should be planted two weeks after last killing frost). Snap beans, okra and tomato plants.

Group 4 (can not be planted until ground is well warmed up, about a month after last hard frost). Lima beans, pepper plants, egg plant, cucumbers, melons, squash, and sweet potatoes.

Falling snow practically destroys sound.

# Starving in the Midst of Plenty

### Acid-Stomach Steals Strength and Good Feelings From Millions

One of the worst features of acid-stomach is that very often it literally starves its victims in the midst of plenty.

And the strange thing about it is that the people with acid-stomachs seldom know what their trouble really is.

No matter how good or wholesome the food may be, or how much they eat, they do not gain in strength. This is clearly explained by the fact that an acid-stomach cannot properly digest food. Instead of healthy, normal digestion, the excess acid causes the food to sour and ferment. Then when this mass of sour, fermented food, charged with excess acid, passes into the intestines, it becomes the breeding place for all kinds of germs and toxic poisons, which in turn are absorbed into the blood and in this way distributed throughout the entire body. And that is exactly why it is that so many thousands of people eat and eat and keep on eating and yet are literally starving in the midst of plenty. Their acid-stomachs make it absolutely impossible for them to get the full measure of nourishment out of their food. And it doesn't take long for this poor nourishment to show its ill effects in a weakened, emaciated body.

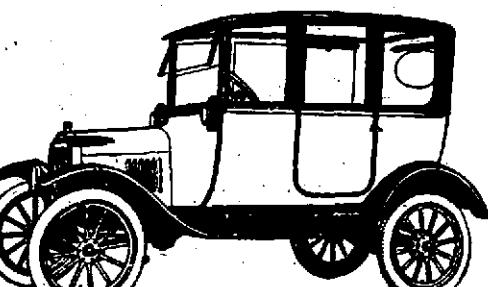

You may say: "My stomach doesn't hurt me." That may be true because many victims of acid-stomach do not actually suffer stomach pains. Then again, there are millions who do suffer all kinds of aches and pains—headaches, rheumatic twinges, gout, lumbago, pains around the heart and in the chest—who never dream that an

## ALLOWANCE TO CHILD IS ROAD TO ECONOMY

Home Economics Expert Says Way is to Teach Youth Early Proper Apportioning of an Income.

The best and most natural way of beginning true national economy, wise spending and wise saving," says Ruth Wardell, head of the home economics department of the University of Iowa, and who last summer started a home economics department in a Cleveland (Ohio) bank, "is by giving the children an allowance. The lesson

of properly apportioning an income thus is early learned."

Miss Wardell favors the allowance arrangement at a very early age, say at six or seven. It may then be very small, and out of it the budding citizen may be expected to provide only school pencils, tablets, etc. The purchase of school books provides a logical next step; a little later some personal belongings, such as shoes, may be added.

"I say shoes," explains Miss Wardell, "because children seem to take more interest in shoes than in most articles of wearing apparel, and be-

cause shoes represent a highly important item to which children frequently pay little heed."

The allowance should provide a little margin to encourage careful buying and saving possibilities. It should not necessitate so much care or thought as to burden the growing youngster. It should never, under normal circumstances, be "helped out" by irregular gifts or expected to cover other than the recognized items. The allowance, with its purchasing responsibilities, should be increased gradually, steadily. By the time high school is reached the boy or girl should be buying practically all his or her own clothes.

## PAINS AND ACHEs YIELD QUICKLY TO SLOAN'S LINIMENT

Are you tormented by Neuralgia, Lumigo, Sciatica, or any of those aches that require a counter-irritant? Then let the soothing, warming application of Sloan's Liniment stop the pain by drawing the blood away from the congested part.

It is the pressure on the nerves by the blood rushing to the inflamed muscle or joint that makes you ache. So when Sloan's Liniment relieves the swollen blood vessels by setting up a counter-irritant on the surface, the

circulation is equalized, sympathetic nerves all soothed, and soreness or lameness disappears.

Sloan's Liniment is probably the counter-irritant most widely used to overcome painful inflammation in cases of neuralgia, sore muscles, wrenched joints, strains, bruises, gout. Rubbing is not required. This clear, clean liquid is easily applied as it does not stain the skin.

#### GETTING A PLANT READY FOR GROWING OUTDOORS

This boy is cutting the bottom out of the strawberry box, in which seeds have been planted, so that he may set the plant, with its ball of dirt, in the ground. The seedling, having received a good start indoors will develop quickly into a vigorous early plant when set in the garden.

Berryboxes are used by many home gardeners to start early vegetables. Others use "flats" or window boxes, and gardeners who grow plants on a larger scale prefer cold frames or hotbeds.

Plants grown under protection from the chilly weather should be hardened off before they are transplanted to the garden, say United States Department of Agriculture specialists. This can be accomplished by ventilation and exposure to outdoor conditions during fine days. By the time danger of frost is past and the plants are large enough to be transplanted to the garden they should be thoroughly accustomed to outdoor conditions.

#### France Gives Aid To America.

The pouring out of French blood and the enormous financial sacrifices are not the only aid France has given America. We are indebted to the French peasants for a perfect remedy for stomach, liver and intestinal ailments which has not only been marvelously successful over there, but has been equally so over here. The ingredients are imported and put up for sale in this country by Geo. H. Mayr, for many years a leading Chicago chemist, under the name of Mayr's Wonderful Remedy. It is a simple harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. **Janesville Walking Plow****What Is Walking-Plow Satisfaction?**

THE handles must be just the right height and swing over far enough in the furrow to allow me to walk squarely between them.

The plow must run reasonably well without too much draft either to the land or to the furrow.

The hitch must be such as to allow the tugs to be reasonably long to give the plow plenty of freedom to find itself in the furrow at the depth I wish to plow.

**All This You Get in Janesville S. & S.**

This freedom in the furrow allows the plow a certain amount of oscillation as it slices the furrow and takes the "pinch" away from the cutting edge of the share. This lightens the draft and saves me time.

The quality of the work must be regular and the furrow left in as uniform condition as the character of the soil will permit. This reduces the cost of working it down into a seed bed.

The long, smooth, easy roll of the furrow over the perfect scouring share and moldboard, and the plow guided by a slight pressure of either hand now and then eases the day's labor for man and team and insures the best work."—A Personal Testimonial. It will do as well for you. Let us prove it.

**SAVING TO STABILIZE  
BUSINESS OF COUNTRY**

Systematic Buying and Elimination of Waste Lead to Prompt Payment of Bills and Happiness.

American thrift will go far to save the life of the world, to bring liberty and to make the pursuit of happiness possible to oppressed humanity. Periodically in the United States there have come times of financial depression; production has exceeded consumption; factory doors have closed; workers have found themselves without money and the retailers who serve them have faced the gloomy alternative of refusing credit and going out of business because of lack of trade, or extending credit and going to smash because of lack of funds. The store closes its doors and immediately other stores, even those competing, feel the unwholesome influence. Panic spreads just as surely as when there is a run on a bank and failure stares many merchants in the face.

Now the more thrifty the people of a community are the more promptly they pay their bills, and the more promptly bills are paid the more remote becomes the possibility of failure. If every worker is a systematic saver, with savings made possible by careful, intelligent buying and the elimination of waste, the hard time will be safely bridged and will be tremendously shortened. It is, therefore, good business for the retailer to join in a campaign against impulsive buying and waste. The mechanician who, in flush times, buys an unnecessarily elaborate article, and who, in hard times, repudiates his bills, is not as good a customer as the one who used restraint in his day of prosperity and had a margin for the rainy day. The former undermines business—the latter stabilizes it.

The judicious buyer who exercises care in his purchase also carefully and conscientiously meets his obligations. The man who throws money away treats his bills as "a scrap of paper."

Waste is an enemy of good business. In certain districts of New York investigators found that 11 per cent of the contents of the garbage cans was perfectly good foodstuff. The amount of usable material abandoned in this country every year amounts to millions. The farmer leaves the plow to rust away outside the barn all winter; the housewife overheats the house; the factory worker throws good material on the scrap heap, and all those things make it possible that in the United States today there are 1,250,000 people whose working days are over, dependent upon charity, individual and county, to the extent of \$200,000 a year, dependent because in their earning days they cultivated habits of waste rather than those of thrift.

Education in thrift must be an education in values. That education must extend past the workers of today to the workers of tomorrow. Heretofore more of a youth's precious school hours should be devoted to a consideration of the principles of how to live, how to take a helpful and progressive part in the problems of a workaday world. The biggest lack in this nation is a department which will teach the value of a dollar.

The young man who in school received the proper training in thrift will take account of the use of savings. Savings is worse than useless if the hard-earned accumulations are invested in some of the innumerable gold-brick, get-rich-quick schemes which take millions of dollars out of our communities each year.

The treasury department is confident that no safer and more attractive plan has been offered for the encouragement of small systematic investment than that of War Savings Stamps. If the investor can lay aside but 25-cents a week he has here the means of putting that amount away in a safe security. If he can set aside four dollars and a few odd cents each week that amount begins working for him at a good rate of interest, which, with

**The COMFORTS of the AMERICAN HOME**

It is a well known fact that home for home, the American household has more comforts and conveniences than that of any other nation.

In foreign lands the modernized dwelling is found only in the better sections of the larger cities.

In America, even in remote rural districts, you find the piano, the vacuum cleaner, washing machines, up-to-date heating systems, telephones and numberless electrical appliances.

There is a well-kept look about residence, store or out-buildings with an atmosphere of prosperity and content.

Did you ever stop to realize why this is so; how this condition was brought about?

It is largely due to advertising. And a big share of the credit belongs to newspaper advertising.

Stop and think how many of the foods you eat, the things you wear and other articles entering into your everyday life, you first heard of through newspaper advertisements.

You will then realize what a part they do play, or should play, in your daily life.

Read the advertisements in the newspapers regularly and thoroughly, if you are not already doing so. They mean more to you than you can tell.

Earl Rankin Bull, Returned Missionary, Says Christian Civilization Prevented Hun Support

**TALKS AT CARTHAGE CHURCH**

Declares Jap Tendency Was All Pro-German Because of Government and German Influence

Earl Rankin Bull, a missionary to Japan delivered a forceful address at the Fletcher M. E. church at Carthage Wednesday night a summary of which follows:

The Japanese will bet his life that there are 8,000,000 gods pitying the Americans who believe in having only one. The influence of this one Christian God, however, saved Japan for the Allies.

The elite of Japan have had their first training from the sons of the Kaiser. The best in music, science, military tactics, law, and medicine was given to Japan by the Hun. The autocratic form of government closely resembles that of the German and the natural thing was for Japan to side with her old instructors. However, the presence of the Japanese Christian statesmen, the Protestant body of 101,000, the Christian schools and the ideals held up by the missionaries saved Japan to the Allies in large part. She not only gave her sympathy but her substance to the Allies. She in-

vested in the government bonds of England, France, Russia, and in our own Liberty Bonds to the value of \$660,000,000.00, built vessels to the value of \$73,250,000.00; chartered 153,000 tons to us at half the usual rate, the Japanese government paying the owners the difference; and now sends about 10,000 soldiers at a cost of \$2,000,000 per month into Siberia to aid in the fight for democracy. The cost of arms and ammunition is extra.

"In Asia, five Chinese have

"At home, as a girl, I had no money. Mother bought things for us children with whatever money father gave her. Since I've been married, it's been much the same. I've got things at the town stores and Jim's paid for them. Even my egg and butter money has gone, as a rule, to help with the household upkeep—turned in on the grocery bill, usually. I've never seemed able to hold on to a penny."

"But when the War Savings Stamps came along I said to myself, 'Here's your chance, Mary!' And now I buy War Savings Stamps regularly, take 'em in change as regularly as I sell chickens or cash the creamery check at the bank. I've filled several cards already, and I can tell you I glost over 'em! When those War Savings Stamps mature I'll have real money of my own."

**CAPITALIZE YOURSELF**

**Hold On to Your Stamps.**  
Do not sell your War Savings Stamps. The government borrowed the money for a specific purpose. If the securities are not retained your purchase will have been of no permanent benefit to the government. The men who buy and save, who follow the principles of thrift, are the people who will shape the destiny of the nation.
